Book
2

WE START THIS WAY~

LET'S CHOOSE A 
SIMPLE OBJECT IN
STRAIGHT LINES
~LIKE A BOOK~

#1—The top of a book, lying flat on a table, is drawn like this,—

#2—Then draw the bottom side exactly under it, this way,—

#3—Now join the three corners so it looks like a book,—

The finished drawing should look like #4.

Practice making finished drawings by going over the dotted lines with your black pencil.

AND-IT IS A PICTURE !

To draw a picture of two apples placed near a book, first draw it in very simple lines (as shown at the top) then finish it as you see here.

Learn to make a finished picture by joining the lines in the dotted diagram.

A "STEP BY STEP" PICTURE

Begin this drawing exactly like the book.

Then place two dots in the center of each line. Join the dots to form the basket handles. Two simple circles are shaped into apples.

Then finish the drawing by going over the dotted lines.

HOW WE
DRAW

SIDE VIEWS of CIRCLES

A circle viewed at your exact eye level will appear as a straight line. The circle widens as it is raised above or lowered below the eye level. See different views of glass jar in diagram.

DRAW SIMPLE THINGS!

Simple objects, like these,
are good subjects for your
'Things I See' drawings.

YOUR CAP *and* YOUR TOP

Your cap, top, and many other things you use and play with, are good 'models'.

CANDIES *and* PIGGIE BANK!

WE DRAW A 'TEDDY-BEAR'

This set of 'step by step' pictures will give you an idea of how to draw your Teddy Bear.

A FUNNY RAG-DOLL!

Here is a good subject to draw.
If you do not have a doll like
this for a model, just copy these
pictures.

CIRCLES *and* STRAIGHT LINES ~

A candle-stick and matchbox will make a good study in straight and round lines. If you have objects like these on hand, try drawing them.

The top diagram shows you how to first 'rough out' your picture.

LET'S DRAW SOME TOYS!

Try to draw this spotted horse. It is an ideal subject. Then practice going over the dotted lines with your black pencil.
